

OCG HAS REVIEWED

SECURITY INFORMATION

EYES ALONE

Mr. Walter Pforzheimer

7 April 1952

Deputy Chief, Foreign Documents Division, OO

Request for Opinion on Possible Copyright Infringement

1. Some translations made by this Division are released in unclassified form. These may be books, monographs or magazine articles from foreign periodicals. Where the document is completely unclassified all identification with FDD and CIA is removed before dissemination. In many cases a classified cover sheet is attached with the notice that said cover sheet may be removed (thus separating any CIA identification) at which the document become unclassified.

2. As mentioned in our telephone conversation this morning, we are anxious to know whether we should attach some device to the effect that the document is distributed for official use and further dissemination might subject the distributor to copyright violation.

25X1C

4. While we can always classify such material "Restricted", which per se would confine its distribution to official channels, there are some cases where this would be undesirable as it would deny its use by various contractors [REDACTED] Your opinion will be very much appreciated.
